0-9 Quiz: Design & Development for Dummies By the end of the 1990s, the worldwide market for AutoCAD had reached almost \$1 billion (USD). Within two years of its release, AutoCAD had surpassed \$1 billion in sales.

According to IDC (International Data Corporation) the market for AutoCAD had doubled from its first year. Since then, it has grown at a steady rate with about 6 million active users per year, and currently it is reported to have a market size of around \$2.5 billion. In the first decade of AutoCAD, it was a cost-effective tool for mechanical and electrical engineers, draftsmen, architects and many other professionals. However, the number of users increased steadily, and also, due to the expansion of the software's market and its availability, AutoCAD evolved from a single-function engineering/drafting app to a full-fledged CAD program with other applications.

Currently, AutoCAD is used by many end users in many different disciplines such as architectural design, engineering, construction, manufacturing, interior and graphics design, and government. Today, AutoCAD is one of the world's best-selling programs and is widely used by engineering professionals to create and modify detailed drawings of projects ranging from bridges, houses and skyscrapers to mechanical systems, railways and electrical equipment. For engineering and architecture projects, AutoCAD offers more powerful 3D features, such as creating and modifying surfaces, creating and modifying solids, manipulating and managing meshes and working with 2D blocks and creating 3D drawings and model spaces. 3D Architectural Design App for Windows and Mac

This year, one of the two teams that will play in the Super Bowl are the Philadelphia Eagles, who will host the New England Patriots. They played a hard-fought, back and forth game in their opening matchup. Last year, the defending Super Bowl champions, the New England Patriots faced the Los Angeles Rams in a matchup that was equally tough. Both 5b5f913d15

Jamaica's National Bank (JNB) on Friday closed its biggest year-on-year sales growth since the previous financial year. The bank's shares closed 3.5 per cent higher at \$10.74, reversing losses after the bank confirmed on Thursday that it would raise \$500 million through a rights issue to shore up its capital base, and increase its tier 2 capital ratio to 9.5 per cent, from 8 per cent. "Our bank has been operating with a capital ratio of just 5 per cent for the past few years, a situation that is insufficient to meet future risks. The bank is now in a position to raise funds to increase its capital ratio to 9.5 per cent," acting chief executive officer Earl Coetzee told the JSE on Thursday. Coetzee said the bank would use the money for general corporate purposes. The rights issue is being underwritten by Standard Bank and North American Finance in the US, which accounted for about half of the bank's sales last year, he said. "Jamaica is one of the fastest growing economies in the region, and we expect the capital base of the bank to grow in line with these growth prospects," Coetzee said. "We remain focused on increasing our assets, strengthening our balance sheet and moving the bank towards a more capitalized and prudent position," Coetzee added.

A case of widespread metastatic adenocarcinoma involving the rheumatoid synovium and soft tissues of the right knee is reported. A 64-year-old male was found to have increased alkaline phosphatase level in the blood. X-ray films showed destruction of the right knee joint. Surgical biopsy revealed a moderately differentiated adenocarcinoma. Immunohistochemical staining of the tumor tissue revealed a strong positive reaction for cytokeratin and a weak positive reaction for alpha-1-antitrypsin. When the origin of this tumor was discussed in conjunction with the literature, this tumor was concluded to be an example of disseminated adenocarcinoma arising in the rheumatoid synovium.
